

## Mobility of Wood Workers (joiners/carpenters) across Europe

2015-1-ES01-KA202-015902

*FAIR OF FURNITURE is annually organized in Kayseri. Approximately 50.000 visitors including foreigners visited it between 19-23 April in 2017. Kayseri Organized Industrial Zone Vocational and Technical Education Centre as a project partner of Mobility of Woodworkers across Europe offered a demonstration of both the institution and the project.*

*Some details of the project were shared with a group of furniture experts from Italy and Austria due to another project called MOBITEK. A key figure of the project from Italy, Mr. Vicente Lopez said he would know AIDIMME and shared fruitful experiences. he will stay in Kayseri for one and half year for the project. He will also be invited to our school to launch a seminar towards our students and instructors about industrial production of furniture. We have had the chance to develop a new project idea during this occasion. Erasmus Plus projects offer valuable opportunities to share information and experience, which makes great contributions to the development of vocational and technical training..*
